"The Sizing People"®

INDUSTRIES, INC.

Midwestern Industries, Inc.

“The Sizing People”

Midwestern Industries has been a leader in the screening industry for 65 years. With a strong commitment to quality and service, as well as a staff of dedicated, knowledgeable employees, Midwestern strives to exceed customer expectations. Midwestern proudly designs, fabricates, machines, and assembles screening and sizing equipment, circular and rectangular vibrating machines, as well as replacement screens and parts. Our goal is to service all of your screening needs.

Through the years, Midwestern Industries has become known in the screening industry as “The Sizing People”®. As a result of working with hundreds of processing industries, we have become proficient in the development of screening equipment and products for handling coarse, fine, wet, and dry materials.

**Headquarters
Massillon, Ohio
(Over 147,000 Sq. ft.)**

**Southern Facility
Macon, Georgia
(Over 42,000 Sq. ft.)**

Common Screening Applications (not limited to these examples)

- Abrasives
- Coal
- Crushed Limestone
- Blast Media
- Perlite Expanded
- Silica Sand
- AG-Lime
- Coke
- Dairy Products
- Limestone
- Pet Foods
- Metal Powder
- Powders
- Fertilizer
- Detergents
- Snack Foods
- Pharmaceuticals
- Textiles
- Clay
- Frac Sand
- Food Processing
- Marble
- Roof Granules
- Plastics

Vibratory Screening Equipment

MEV®
The MEV utilizes an elliptical motion to convey material across the screening surface. From scalping applications to fine mesh screening, the MEV provides consistent performance and value.

MR Separator
The MR Series Gyra-Vib® Separator utilizes a center-mounted motor and a unique weight system to control the vibratory screening motion during the screening process.

Multi-Vib®

A powerful and compact screener in a highly efficient design. The Multi-Vib can do the job of its larger counterparts. Save time and money with its quick-change, end-tension screens.

Screen Heating

Reduce screen plugging due to wet or damp material by adding a Converta-Screen® Heating transformer. This system can be added to a Midwestern screener or installed on most makes and models.

Uni-Rod®

This scalper/screener/grizzly is built to help prevent obstructions from slowing down production. Steel bars paired with sizing screen cloth effectively screens coal, limestone, sand, gravel, and more.

ME Separator

The ME Series variable speed Gyra-Vib® Separator gives the user ultimate control of the screener's frequency. This provides accurate particle travel for your material.

MR-7

The MR-7 Screener is engineered for conveyor-type installations. End-tension screen panels can be changed in just 15 minutes and are offered in a single deck or double deck design.

Low-Profile

Featuring a flow-through design that's effective for high capacity screening of scalping applications. Compact design for existing product lines and "tight-fit" installations.

Uniflex

A high capacity and portable screening solution designed to be cost-effective with minimal maintenance. Ideal for particle sizing, continuous or batch screening, scalping, and pilot plant ops.

Bag Dump

Designed to easily scalp oversized contaminants from manually dumped bulk materials before entering the processing line. Constructed to food, pharmaceutical and other industry standards.

Universal

The Universal Screener provides a reliable way to screen a variety of materials. Its rugged construction allows for trouble-free screening with very low maintenance requirements.

Porta-Sifter®

An inexpensive, versatile, "go-anywhere" vibrating screener, perfect for research, batch runs, or continuous production. Designed with very few moving parts and minimal maintenance needed.

Univibe

A portable and cost-effective screener for lab screening or small production requirements. The self-discharging vibrating screen is ideal for small, single deck screening applications.

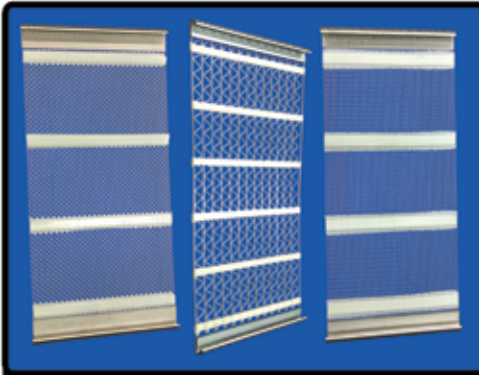

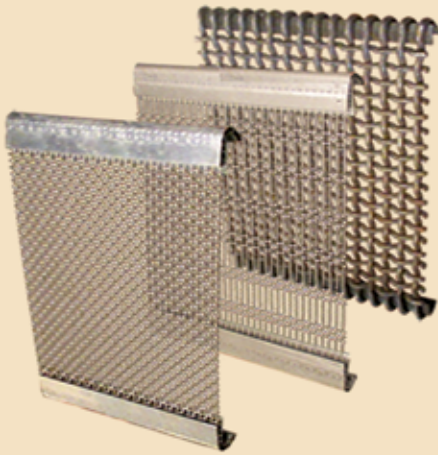

Ultra-Vib

Utilizes a high-frequency, straight-line motion that gives excellent liquid/solid separation. Screen frame assemblies are easy to install and remove without the use of any tools.

Accessories, Parts, & Services

Wire Cloth Weaving

Midwestern Industries weaves coarse and fine mesh screen cloth to standard or custom specifications. We also maintain a large inventory of finer stainless steel mesh. Competitive prices combined with fast delivery have made Midwestern a leading supplier of industrial wire cloth.

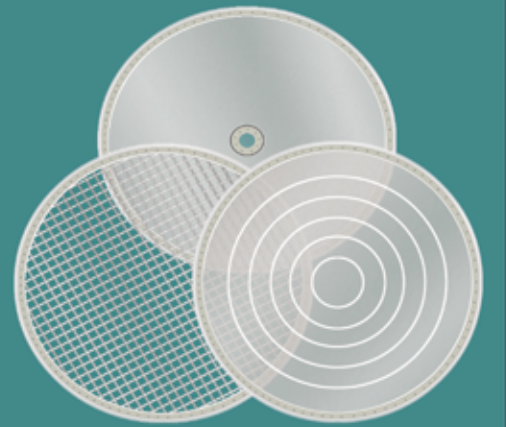

KLEAR-SCREENS

Increase screening efficiency, increase screen life, and produce consistent product. Individually manufactured to your required size and specifications. Designed to decrease cost per ton and made to fit most applications and units.

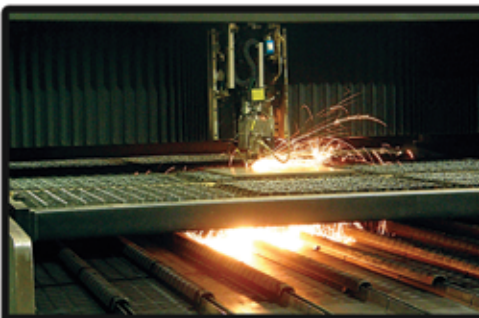

Replacement Round Screens

Midwestern Industries supplies a wide variety of screens for all of your round vibratory separators. We work with our customers to ensure that you get the type of screens that you want in the sizes that you need.

FREE Material Testing Facility

Midwestern Industries believes this is the best tool for our customers to make informed decisions about their screening process. The simple act of sending in material can save you time and money by purchasing the right equipment the first time.

Laser Cutting

Midwestern recognizes the need for precision laser cutting services for smaller shops and large corporations alike. From single item prototypes to full-scale production, Midwestern's laser has the accuracy that you need.

Replacement Parts

Midwestern Industries is your source for replacement parts for most makes and models of vibrating screeners. Speak to one of our direct sales professionals to obtain pricing and delivery options. Emergency shipping is available - Ships the same day or within 24 hours!
