

MASP Screener

The Midwestern MASP screener/scalper is a compact screener that's designed for high-volume screening of asphalt, aggregate materials, and more. The unit can be manufactured in a variety of sizes ranging from 3' x 8' to 5' x 10' with single or double-deck options. The MASP also offers a deck changing feed option that allows users to switch the feed to either the first or second screening deck on the fly.

The screener features a heavy duty two bearing vibrating screen, with two selected side-tensioned screen surfaces for product size on a parallel grid deck design. The particle stream is split up on a total of 24 sq. feet of screening area. The unit is to be pedestal mounted and complete with sub-base frame.

The MASP has long-life spherical roller screen bearings and is driven by one 5 H.P., 230/460 Dual Volt, 3-phase, 60 Hz TEFC Motor with motor mount and guard. The feed box is steel lined with replaceable A-R. Complete and self-contained. Less screen panels are needed. This unit, including the motor, is warranted for 12 months for workmanship and materials from the date of shipment.
